

Remember what you
learned about shade taking?

This will make you forget it.

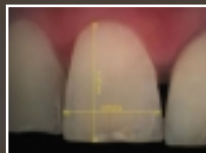

**Spectro
Shade™**

Experience the power of SpectroShade to dramatically enhance the quality of your practice. With the innovative SpectroShade system, not only will your restorative work reflect your ability... you will save valuable chair time and increase patient satisfaction. The ability for simple or complex case planning is greatly enhanced using SpectroShade's comprehensive communication features to easily interact with your lab.

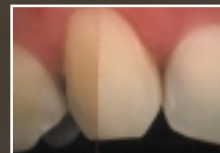

The patented SpectroShade system lets you confidently match the shades of natural teeth to a variety of restorative materials and shade systems. Amaze patients by utilizing SpectroShade's split screen feature displaying before and after images allowing you to accurately track bleaching treatments. A variety of other powerful case planning features allow you to measure precise tooth size, import and export data, forward patient images and other Rx information quickly and easily to your lab, as well as maintaining a complete archive of patient images.
